

BUILDING WORK

For the next 12 weeks, building works will be undertaken to replace windows and improve the condition of the brickwork around the front and rear of the Nursery area. In addition, a door which will open on to the Lower Unit playground is to be installed in the Reception/Year 1 toilets. These improvements are being paid for by school and a grant from the Government.

We aim to keep the Nursery open throughout as the windows themselves will be replaced during the Easter holiday.

The buildings in these areas will be surrounded by scaffolding, with a 2 metre mesh fence as a safety barrier. There will be a storage container, cement mixers etc.

This will mean that it is paramount that you teach your child(ren) about safety (we will also do that in school of course). To this end can you please ensure close supervision of your child(ren) at the beginning and end of the school day outside the Nursery and on the Lower Unit playground.

THE ONLY ACCESS TO THE NURSERY WILL BE THE GATE ON STATION ROAD.
